AutoCAD offers users an integrated application for 2D drafting, architecture, engineering, industrial design, and construction. It allows users to design and create most aspects of architectural and engineering drawings, as well as sheet metal, piping, and mechanical engineering drawings. AutoCAD is the only CAD software application to offer direct modeling of construction details and architecture. The AutoCAD 2D mobile app is used by thousands of architects, engineers, and contractors daily. AutoCAD began as AutoCAD R14 (also referred to as R13), a DOS-based version of CAD originally designed and developed by the German company Technischer Überwachung, and first released in 1985. AutoCAD was one of the first computer-aided design (CAD) programs, alongside Archicad, EcoCAD, and Wavefront's Pro-E. By 1994, the industry-standard AutoCAD had been ported to the Macintosh, and had become the de facto standard CAD program for the Macintosh platform. AutoCAD's success led Autodesk to acquire Technischer Überwachung in 1991. The company expanded AutoCAD to include additional features, including 3D modeling, and eventually renamed it Autodesk AutoCAD. AutoCAD was the first CAD application to have a feature-based user interface, and to offer many different drafting tools and drawing capabilities. The AutoCAD 2D mobile app now offers all of these features. AutoCAD is a professional-level CAD application used by architects and engineers for drafting, graphic design, and modeling. AutoCAD is also used by industrial engineers, mechanical engineers, and mechanical and civil engineers for drawing and modeling of machinery and architectural design. Some engineers use AutoCAD for mechanical or civil engineering design and drafting work. AutoCAD is used to create architectural drawings, mechanical engineering drawings, plumbing, electrical, sheet metal, piping, engineering designs, and architectural drawings. AutoCAD covers multiple disciplines in the engineering and construction industries. Mechanical engineers, industrial designers, and civil engineers can utilize AutoCAD to create, edit, and modify machine designs, building blueprints, and mechanical engineering drawings, while architectural engineers can use AutoCAD to create architectural and structural drawings. AutoCAD covers a wide range of engineering and architectural design disciplines, including: Architecture Civil engineering Construction Mechanical engineering

She co-owns the music label PowerMizz Entertainment and is also the CEO of her personal company Power Planet. As a founder of both labels, Kim's music acts like Jordan Sparks and Jessica Sutta have been mainstays on her label since its inception in 2008. Garnet says of Kim, "Since her rise to the top, she has acted with a very particular consistency. There's an extremely focused perfectionism that she brings to her career that has been seen in her fashion and music." Natalie and Kim took to the stage at the grand finale of Complex Con and seemed to have a lot of fun at each other's expense. What do you think about Kim's reputation? How does she embody the phrase 'business with a heart'?The forward has been linked with Arsenal, Chelsea and Manchester City, as well as a number of Premier League clubs. Manchester United manager Jose Mourinho says he wants to win the Champions League before trying to win the Premier League again. United are battling with Liverpool, Manchester City, Manchester United and Arsenal for the top four places in the league, while Chelsea are out of the Champions League. The Red Devils are currently fourth and face West Ham in their final match of the season at Old Trafford on Sunday. Jose Mourinho has big plans for the new season, with the club having not won the Premier League since Sir Alex Ferguson retired as manager in 2013. "The target is to win the Premier League before we try to win the Champions League," he said. "There are many things to think about in the winter. In the winter I prepare my team to play for the title, play for the FA Cup and play for the Europa League. I don't think we have a choice. We have to play. "My idea is to win the Europa League. I don't see a choice. It's about our hands. If we don't get the Champions League - we are not in this situation - if

No more needing to update your entire drawing when your changes have been made. Upload changes to a web file, share with team members, or move it back into your original drawing. With Markup Assist, AutoCAD is already there, watching for changes. (video: 1:23 min.) Markup Import: Automatic detection of image and text content and importing into a drawing. No more manually separating colors into a new drawing, nor having to recreate color separations for your drawings. Bring your images and text into your drawings and change color instantly. (video: 1:17 min.) Markup Assist: Automatically add corrections from printed paper or PDFs to your drawings. Import corrections from a color printer, fax machine, or word processor. (video: 1:36 min.) Document Map in the Drawing Window: Automatic conversion and creation of a 2D cross-reference to your 3D drawings. Easily share and reference drawings with team members. (video: 1:25 min.) Direct Creation of 3D Text: Simplify the creation of 3D text and typeset text. Put text on your drawing. (video: 1:06 min.) Automatic Markup of 3D Models: Import models and parts from 3D CAD and integrate into your 2D drawings. (video: 1:23 min.) Text Wrapping: Improve readability and cut down on production times. Wrap your text up to 4-wide to fit more text on a line. (video: 1:03 min.) Deleting a Drawing: Delete a drawing from your drawing set and from the active drawing window. Only the selected drawing is removed from the drawing set, so you can still refer to your active drawing from within the drawing set. (video: 1:20 min.) Word Wrapping: Make your text fit on any shape. Avoid annoying squished text and more readable text with word wrapping. (video: 1:02 min.) Kangaroo Preview in the 3D Viewer: Now you can preview a 3D model without changing any settings. (video: 1:17 min.) New Project Features: Automatic search for available resources when you create a new project. Automatically check for project dependencies and create your project only when all dependencies are available. (video: 1:21 min.)
