On 16 October 2010, CollabNet decided to no longer support Subversion as its primary version control software for AutoCAD, which causes support for AutoCAD to end on 6 December 2010. Prior to this decision, CollabNet supported AutoCAD with Subversion as a primary version control system, which causes support for AutoCAD to end on 6 December 2008. The primary driver for this change was the loss of future development and support for the collaboration features of Subversion. AutoCAD was the first 3D CAD application to support automatic revision control through the use of Subversion.
