Asteroids: Recharged Features Key:

1 playthrough - Begin again with a completely blank slate, wielding a state-of-the-art arsenal of bonus ammo and a fully refuelled ship
Combined top down and overhead point of view: navigate the solar system by jetpack and explore its depths by submersible
Six authentic spacecraft from the original game: interact with and upgrade each type of spacecraft, each with its own strengths and weaknesses in terms of speed, weapons and shields
Four portable power tanks: fire a blast to recharge shields and weapons
New, more evocative soundtrack: stronger, more majestic 90s power metal and the squeal-inducing synthpop of the dark AI enemies
Multiple Endings: die many times, but not before reaching a different outcome – see if you can solve all the game's puzzles
All new onscreen buttons and mechanics: play the game with a different mouse scheme with a control method that makes sense to you

Expert > Non-Expert

- **Highlights:** the game's biggest achievement is its streamlined and rewarding core gameplay that keeps you coming back
- **Advanced mechanics and cues**: avoid revealing enemy weapons through sensible choices in combat
- **Automated scenarios**: helpful and scalable difficulty levels kept online, save "homework" challenges to complete for achievements
- **Easy to learn, hard to master**: learning curves fall fast, but revisit if you come unstuck – a tutorial mode of some kind would be a nice addition
- **Multiplayer**: throw down in a quick death match online

Hardcore > Casual

- **Extreme modes**: fight giant monsters with upgradable weapons or just mow them down without making any sound
- **Abilities of real-life NASA scientists**

What's new in Asteroids: Recharged:

Asteroids: Recharged is a 1997 action-adventure video game developed by UK-based company Absolute Software. The game was published by Disney Interactive in North America and Europe. Gameplay The game is a first-person action-adventure set in a 3D environment. The player must navigate the asteroids by rocket jumping and performing numerous acrobatic maneuvers. Traversing a shorter distance will cause the player to rocket for up to 15 seconds. Careful planning is required for the player to successfully escape death. The player must be careful, however, not to rip through the ship's internal shielding or cause too much damage. Destroying the asteroid landing pad will clear the area of space missions. The ship's systems are drained during the battle with the enemies. A bar is monitored on the HUD by the name of EP. Using up the EP will lower the player's shield and also drain the various weapons. If the EP bar is fully drained, the player will be blasted out into space with no shield and the guns will be unusable. Despite being a first-person game, the player is able to navigate the ship in any direction they wish as the asteroids rotate around their axis as well as around the third dimension. Destroying a given number of asteroids will cause the enemies to scatter throughout the surrounding space. In some areas, a sequence of actions must be performed for one area to be removed from the playable space. Actions include destroying the weapons, activating the shield, utilizing the items, landing on specific points, and exiting the ship. Enemies Numerous enemy races are fought in the game. For the most part, they are viewed as being little more than a nuisance and are grouped together as one category of enemies. By controlling the ship's powerful weapons, the player is able to blow away the groups of enemies quickly. In one section, the player must merge into a single enemy by flying underneath it through the space of a large platform. As the player collects items, they unlock bonus objectives at the end of each level. For example, if the player defeats all 15 robots and collects all five robots, they will be able to use the robot parts to transform the spaceship into a combination of the five robots and fly through the enemies as one boss. Completing each level unlocks

another automatically played bonus level. There are three bonus levels in the game, each containing a Volla. The first level of the game, however, takes place on the
