

NetEraser License Keygen Free Download PC/Windows

NetEraser Crack Mac is a small and handy application designed to help scan and clean old, junk, duplicated and privacy files from your computer. It also removes hidden web tracks and saved history for both Windows and the web browsers. Search the web browser and delete unwanted files. The app is wrapped in a neat and clean interface, structured in six distinct categories: "Home", "Scan", "Clear web browser", "Repair", "Startup and uninstall" and "File shredder". The "Home" tab displays the performance level of the system, the risk (low, medium, high) and when the last scan was performed. Select what elements should be scanned. Plus, categories like junk, duplicates or malicious ActiveX files can be marked for the scan. NetEraser also lets you erase the history folder, cache and cookies and recently typed URLs from Internet Explorer, Opera or other browsers you may have installed. Repair files and handle startup programs. It's possible to follow the same steps for Windows Explorer's temporary files and recent documents, as well as for the system, Recycle Bin, clipboards, logs or dead desktop shortcuts. Once the scan is complete, the records are displayed in a list with their extension name and description, and can be restored. Check the status of the firewall and NetBIOS. In the "System Repair" tab, the tool displays the status of several system functions, such as the firewall, NetBIOS, RPC locator or IPC\$. Plus, you can reduce the booting time by removing unnecessary items from the startup list or by uninstalling the ones you don't need anymore. It would've been useful if the app offered a scheduler to set automatic scans on specific days, along with a registry defragmentation function. Decent system scanner and cleaner. Taking everything into consideration, NetEraser is a reliable utility that comes in handy when you want to scan, delete and repair outdated and unnecessary system files, as well as clean the web browser's cookies, history and downloaded items. NetEraser Features: Search and delete web browser files: Hide and remove the stored history and cookies from the web browsers and "Feed" panels. Search and erase "Send to" list. Identify and clean the unwanted elements in the Firefox, Internet Explorer and Opera browsers. It can scan for the Malwarebytes, 2-Factor Authentication, FoxyProxy and Virtual Networking. The application can scan the Windows Registry, as well as the system and cache.

NetEraser Crack+ Serial Number Full Torrent [Win/Mac]

☐ Decide to take action on what you are feeling: You can decide to repair corrupted system files, remove junk, clear private data or remove Internet tracks. ☐ Quickly scan and clean files in all Windows segments: Use the Start-up and Repair, System Repair and Scannable options to remove useless data from your hard disk. ☐ Scan and erase Internet browser and history items: NetEraser is capable of scanning and erasing Internet Explorer, Opera and Mozilla privacy files. ☐ Remove historical information, Uninstall startup files and more: Decide what information you want to remove from your PC. NetEraser Crack Torrent (Activation Code) X64

This unique and impressive application allows you to find and delete the following Internet history items: bookmarks, recently visited pages, and saved passwords from browsers such as Internet Explorer, Chrome, Firefox, Opera and more. It is very easy to use and requires only minimal computer skills to set up. One of the best features of NetEraser is the ability to automatically back-up your files on the Internet, eliminating the need to use third-party programs that require prior registration to access Internet history. This is a feature of the application that is usually not offered in other privacy applications. The application also allows you to remove (shred) files, folders, applications, shortcuts, etc. from the Internet Explorer, Chrome, Firefox, Opera, IE, Chrome and the system (Recycle Bin). Once this feature is activated, the tool will automatically scan the Internet Explorer, Chrome and Mozilla Firefox every time you launch the application. The program will search the computer for the unwanted history items, including your Web browser's history, browser bookmarks, recently visited pages and saved passwords. When the application finds any trace of unwanted history, the entry is marked as a duplicate, and the original is moved to the "Safe list". The Safe list includes some of the most common Internet history items, such as your Web browser's history, recently visited pages and cached information. It is possible to remove each entry from the Safe list, if you are sure that it's not something you need. You can also customize the program by choosing what folders and files should be scanned, or by selecting a particular browser (Internet Explorer, Chrome, Firefox, Opera, IE, Chrome and Mozilla) and its history. You can activate the "Safe list" function, which stores a list of URLs of websites that you have visited recently, so that you can easily remove them at any time. This is a useful feature if you wish to back-up your computer history without having to download any third-party program. The system can also be used as a file shredder, shredding your old and unwanted files and folders. NetEraser can help you secure your computer by scanning the Internet Explorer's history for hidden viruses, and remove all traces of unwanted applications. When the Internet Explorer is not in use, the program will automatically shreds the files or folders with a specified extension. Additional features: - Erase files, folders, applications, shortcuts, etc. from Internet Explorer
